

Enamelled Cast Iron Grill/Griddle

15.8" × 11.5" × 0.5"

Cooking Tips

Place the grill/griddle in your June before starting a recipe or Cook-Program. This will allow the cast iron to preheat along with the oven.

Cast iron is excellent at retaining heat—just as it takes time to heat up, it will take time to cool down. Use caution, and protective oven mitts when handling.

Care and Cleaning

We recommend hand-washing with a brush and soapy water. Dry thoroughly before storage. Avoid thermal shock by allowing the grill/griddle to cool to room temperature before submerging in cold water.
